1 Unlock Tool Introduction

The unlocking tools include "SecretProbject.exe" and "SunyardSmartToolKit.exe". "SecretProbject.exe" file is located in the "SecretProbjectTool" folder, and "SunyardSmartToolKit.exe" file is located in the "SunyardSmartToolKit" folder. Among them, the "SunyardSmartToolKit.exe" tool needs to be operated with a Type-C connecting cable.

2 Preparations Before Unlocking

2.1 Install the driver and prepare Type-C data cable

Install the driver: Open "usb driver" folder, select the corresponding file to install the driver, after the installation is successful, open the "Device Manager" of the computer, click "Port", the display is as follows:

3 Unlocking Procedure

1、 The device powers on and enters the trigger state, the terminal page is shown in Figure 1.1 . Select the "Function" button to enter the page shown in Figure 1.2. If the device does not enter the page by pressing the "Function" button, you can restart the device and then press "Function" button.
